* Pride® FDA Class II Medical Devices are designed to aid individuals with mobility impairments.

1. Maximum speed varies with user weight, terrain type, battery amp-hour (AH), battery charge, battery condition, and tire condition. This specification can be subject to a variance of (+ or -) +10%, -5%.
2. Range per charge is established by testing conducted at maximum weight capacity, in accordance with ANSI/RESNA, WC Vol2, Section 4 & ISO 7176-4 standards. These results occur from theoretical calculations based on battery specifications and drive system performance.
3. Due to manufacturing tolerances and continual product improvement, this specification can be subject to a variance of (+ or -) 3%
4. The unit's total weight may vary based on differences in battery weight by battery manufacturers.
